## AMARON COLLECTION

**5G® LOCKING SYSTEM** is based on a single action installation method. The boards are locked on the long side with a traditional angling method. When a panel is folded down, a flexible plastic tongue is pushed into a tongue-groove. As the panel reaches its final position, the locking tongue snaps out into a wedge groove, emits a click sound and locks the product vertically. Floor installation has never been easier.

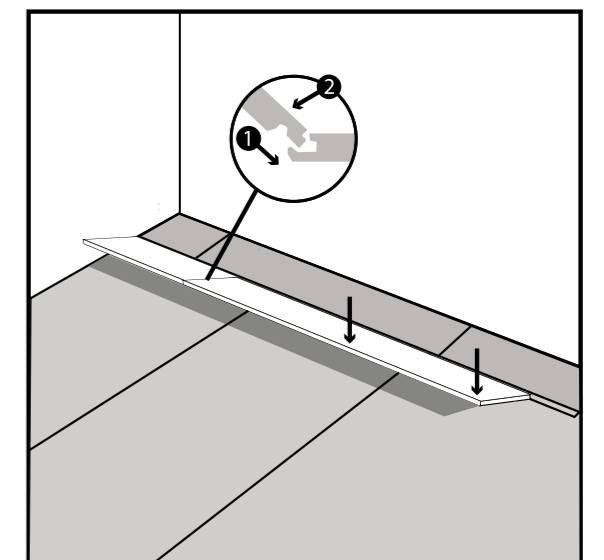

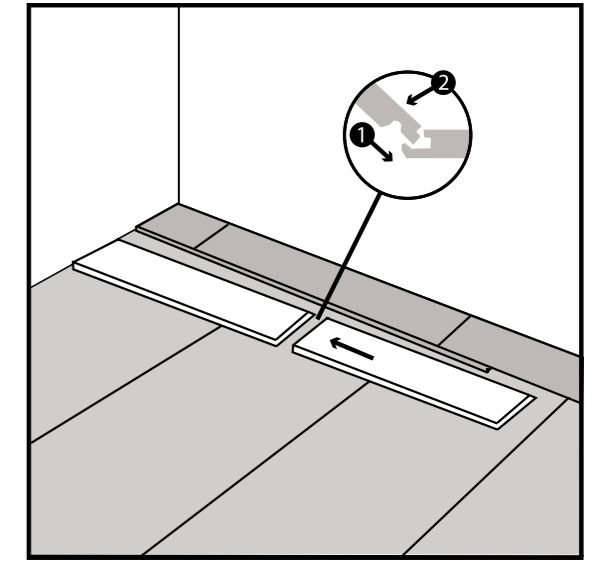

STRONG & SILENT  
**CLICK FLOOR**

## LIBERAL COLLECTION

**2G® LOCKING SYSTEM** is a strong and durable mechanical locking system installed by angling. Suitable for all panel widths, vertical and horizontal locking. Robust and easy floor installation.

## QUICK RENOVATION

Flooring is incredibly important when it comes to renovating, but still many of us decide to leave it as it is and redecorate the rest of the room. Why? We are afraid of the high cost of ripping it out and of course of the mess with it.

We can't be more wrong! With Arbiton vinyl flooring and dedicated Fastlay underlays renovation of flooring is nice, quick and simple. Find out more at [www.1space1floor.com](http://www.1space1floor.com)

### INSTALLATION

Minimum subsoil preparation (eliminates small unevenness) and much faster installation than glue assembly.

### USAGE BENEFIT

Floors installed with Fastlay can be used almost immediately after installation (the initial bonding time for the adhesive is 30 minutes).

### DISASSEMBLY

Possibility of quick disassembly the floor without damaging the subsoil.
